FY/2006 One Year Objectives for the City of Albuquerque Environmental Protection and Enhancement Goal, Objective #10 - Status Report

OBJECTIVE #10. PGS Bill No. F/S R-02-111 calls for the establishment of Land Use Measures (LUMs) to be used as part of air quality determinations for the Mid-Region Council of Governments' (MRCOG) transportation plans. The bill calls for LUMs to be submitted to MRCOG and to the Albuquerque-Bernalillo County Air Quality Control Board (AQCB). The Environmental Health Department shall work with the AQCB, MRCOG, and City Council Services to determine how land use development practices, such as Transit-Oriented Development, mixed use development, and Traditional Neighborhood Development, can reduce air quality impacts and also to identify ways that these beneficial land use practices can be promoted through the AQCB's educational and regulatory activities. A progress report on this project shall be submitted to the Council by the close of the third quarter of FY/06.

Attached is the required report on progress being made toward achievement of FY/06 objective #10. This report is forwarded for approval by the City Council..
